Online upgrades

Online double-sided upgrade	Upgrade the Rio Pro 360 Uno to the Rio Pro 360 Duo. Delivered online through the driver interface.
Online Custom HoloKote upgrade	Grid or full card pattern. Up to ten custom designs can be added through the driver interface using the online HoloKote tool.

Card security options

HoloKote™

An anti-fraud watermark printed across the entire card surface. The Rio Pro 360 includes ten standard designs.

HoloPatch™

HoloPatch cards have a highly reflective gold 'super diffuser' foil square that enhances the visibility of the overprinted HoloKote logo.

Custom HoloKote™

Up to ten bespoke watermark designs can be added through the driver interface using the online HoloKote tool.

Magnetic stripe

The Rio Pro 360 can be specified with ISO 7811 HiCo and LoCo encoding of magnetic stripe cards. Other formats available on request.

Smart card encoding

The Rio Pro 360 can be specified with contact chip, MIFARE®, DESFire® and iClass® encoding capability. Other formats available on request.

THE PLASTIC CARD PEOPLE

The industry standard for ID printing has advanced

» faster print speed
 » enhanced security options
 » improved print quality
 » embedded CPU

Rio PRO 360™

MAGiCARD®

ID with an IQ

Rio PRO 360™

Magocard has raised the bar. The Rio Pro 360 is everything users love about the original Rio Pro but with faster print speed, increased capacity and improved print quality. All of this is powered by the all new LYNK onboard intelligence – for identity with an IQ.

LYNK intelligence

This is a printer with intelligence. The 360 is the first desktop ID card printer with an embedded Linux-based CPU. This enables seamless communication and the secure processing of ID data – just imagine it's got a brain onboard.

Connectivity intelligence

LYNK recognises USB and Ethernet and can easily be integrated with most third-party applications locally or in the cloud. WiFi connectivity will soon be available.

Optimised intelligence

The 360 is Magocard's fastest printer to date. The new electronics and software platform has enabled significant performance improvements. From the moment you hit print, the 360 instantly gets to work. Full colour cards with HoloKote® print in just 18 seconds click-to-card.

The LYNK onboard CPU has a wider colour spectrum to choose from. Printing is even more vibrant and colour rich – which on an ID card means a truer representation of the subject.

Versatile intelligence

The state-of-the-art Rio Pro 360 is a cost-effective way to create secure ID cards in high volumes. The choice of 100 or 200 input card hoppers provides users with the opportunity to batch print large number of cards in one go.

Secure intelligence

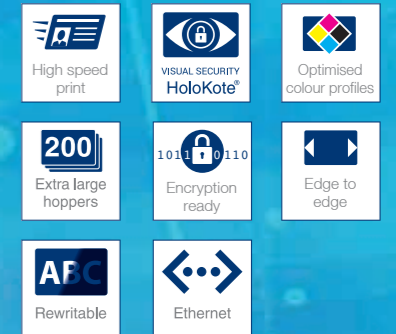

Like its predecessor, the Rio Pro 360 can print an anti-fraud customised watermark on every card. LYNK now enables the secure online delivery of bespoke HoloKote® watermarks to the printer. Where previously only one design was available per printer, now users can store up to ten.

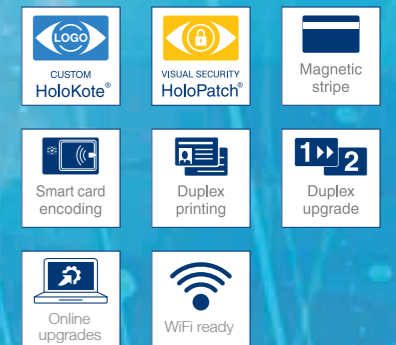

Rio Pro 360 - the **intelligent** identity solution

Printer features

Standard

Optional

Free 3 year limited warranty and support*

The Rio Pro 360 is backed by the best warranty in the industry. The fully comprehensive three-year UltraCoverPlus package includes no-quibble printhead cover and a hot-swap loaner service. 360 users will never be without their printer and always have full access to the global Magocard technical support team.

*Available in the UK, EU, North America and other selected territories. Elsewhere a minimum of one year limited depot warranty.

The intelligent identity solution for:

Enterprise, facilities, education, governments and payment applications.
